

Hand-held welding torches Vento-HB

Vento-HB (combined with the MINI-electronic welding gun).

Product description

Vento-HB – the strong and mobile hand fan for our MINI-electronic welding gun; maintenance-free because the motor can be operated without collector carbons. The Vento-HB belongs to the Vento-Line family and is characterised by its brushless motor. With consequential optimisation of the active core elements of the motor and the use of modern individual cog winding, the power density is considerably increased in comparison to standard brushless motors. This means the Vento-HB fan achieves a strong air output of 450 litres/minute.
